

# TuffRock

Supporting Nature's Balance™

**"Winning horses need the right conditions ... inside & out"**

## TuffRock Conditioner Plus - *The Collagen Effect™* for horses

Only 20ml once a day for 350+kg naturally supports collagen generation, digestive health & feed conversion. Use twice daily for GI cooling, Show Preparation, working horses, nervous horses, injury recovery or to support normal healthy joint action in pleasure & performance horses. Collagen benefits joints, bones, muscles, ligaments, tendons and skin including hoof, coat, mane, tail to help condition horses. Assists calcium uptake for healthy skeletal structure vital for growing or arthritic horses, supports healthy mucosal linings for feed conversion and can help normalise gut acid levels for horses under competitive stress. This means no matter what type of feed or how much work you give them; your horse can be in show condition while remaining calm and focused on the task at hand. Horses love the taste of the 100% natural volcanic minerals it is made from. Simply paste liquid on tongue or put on top of feed.

## TuffRock Non-Medicated Poultice

*World's first non-medicated energized volcanic poultice*

Use as a hot or cold therapy to treat or prevent inflammation, swelling or pain; or to draw out fluid from affected areas. Intended for use on intact skin or minor wounds only. Manufactured from TuffRock's unique blend of all-natural, energized alumino-silicates and ancient montmorillonites. Patent pending.

**TUFFROCK NON-MEDICATED POULTICE WILL BE AVAILABLE IN NZ SOON!**

**ANGELA ROGERS - JAMEEL ARABIANS - JEK ALLIANCE - NEW ZEALAND**

"Over the years we have tried many different brands of minerals/weight-gain products to aid us in the show preparation of our own horses and those of our clients - some with very mixed results. Needless to say, when we heard that TuffRock Conditioner Plus was finally available here in NZ, we were delighted! The results with TuffRock are visible very quickly - there is no down-time, waiting to see if there will be a change to the show horse's condition - and in this profession, I only have 6 - 8 weeks to get a horse ready, so I can't afford to have any down-time at all. When Jacob JCA arrived after a gruelling trip from the USA, he was put onto the higher dose of TuffRock Conditioner Plus (20mls twice per day for horses 350+kg), and in only two weeks he could have gone straight into the show ring. Our weanlings and broodmares have also done just so well on this product! TuffRock Conditioner Plus also has other incredible properties - our prized broodmare JA Kaleeka, a former Supreme NZ National Champion Exhibit, was bitten on her shoulder by a white tail spider. The surrounding area and one front leg was hugely swollen and turning black. Antibiotics and anti-inflammatories seemed to be having little effect on the wound - things were looking very grim! Kaleeka was put onto the higher dose of Conditioner Plus and within just five days the blackness and swelling caused by the bite had started to disperse. The results for us using TuffRock have been outstanding and also extremely cost-effective. WE STRONGLY RECOMMEND GIVING TUFFROCK A TRY - YOU WON'T BE DISAPPOINTED!"

JACOB JCA - USA
