Technical Assistance:

TuffRock always recommends seeking veterinary advice.

Product Safety Data available on request. For more information, please ring +61 (0) 2 4936 1899 or email address below.

TuffRock complimentary Products – Stable Plus for environmental hygiene

TuffRock manufacturers **Stable Plus**, volcanic sand additive for horse bedding.

We recommend its use to help break pathogen cycles, eliminate ammonia odours and reduce fly problems. TuffRock promotes good hygiene and reduced risk of cross-contamination.

Foal Plus HISTORY:

Foal Plus was developed over 3 breeding seasons in conjunction with the breeders & vets of the Thoroughbred industry. 500 foal trials were conducted during this time and since July 2004 there have been some 8,000 successful applications delivered in centres of breeding excellence in both the Northern and Southern Hemispheres.

Foal Plus for OLDER HORSES

Foal Plus may be used with older horses. For yearlings or older horses a different dosage regime is recommended maximum 150 ml twice a day. Please contact your vet or TuffRock for any technical assistance required.

TuffRock Foal Plus contains no animal compounds or proteins, no residuals, no drugs, no heavy metals, no antibiotics, no probiotics and no enzymes.

TuffRock promotes animal health through volcanic products that naturally support normal physiology
