

GRADLOW – My Cushing's horse

by Máire Gleeson, Ireland.

Thank you for sending me the info on the TuffRock Poultice and the TuffRock Foal Plus ... they will become part of my kit from now on. Here are 2 photos of my wonderful horse Gradlow (below).

The first one is as a result of following bad information - he dropped all his condition within 10/14 days. The second one is Gradlow 5 weeks later - I had him on 20ml TuffRock Conditioner Plus and as you can see he is a totally different horse, all his skin infections cleared up, his coat is just wonderful now, he got a bout of laminitis 5 days after the second photo was taken, left him on the sweet grass too long.

I'm telling everyone who will listen about TuffRock ... my horse is in a very busy yard, and once I get the Poultice I will be showing it off to everyone. They are very slow to change and are actually trying to get me to use different stuff, but I am not changing so long as I can get my hands on the TuffRock products.
