

Dear TuffRock people

My name is Kirstie Wyhoon and I am 20 years old from Maleny QLD. I have attached a photo of my 7 year old TB hack who was chased into a fence by a dog. The hole in his lower shoulder could comfortably fit two fists inside and there was a mass of muscle left hanging on the outside. It could not be stitched or dressed. My local saddlery, (Sandale saddlery) recommended your TuffRock Poultice to treat his injury. After four weeks of treatment he is now pleasingly back in his paddock during the day. I am ever so grateful for your product, it has not only given me back my hack, you have given me back my mate. I have taken photos every week. If you would like a testimonial I can forward you all the in-between shots.

Gratefully yours,  
Kirstie
