

# TuffRock

Supporting Nature's Balance™

## WORLD'S FIRST 3 AND 2 DIMENSIONAL VOLCANIC MINERALS WITH AVAILABLE COLLAGEN

### DUAL ACTION:

**TUFFROCK CONDITIONER PLUS** is an all-natural, ultra-fine blend of aluminosilicate volcanic tuff (consolidated volcanic ash) suspended in a highly palatable colloidal solution.

**Conditioner Plus** has a dual action: It is both a gentle passive protectant of the vulnerable gut lining, and an active adsorbent and detoxifier. The tuff in **Conditioner Plus** has a powerful natural electrical energy, and our Tuffrock processing technology boosts this energy. The molecular structure not only binds toxins, but the electrical charge we insert means it actively attracts these gut stressors. They are trapped and gently passed out of the bowel in the normal way without unbalancing the natural gut flora. In this way **Conditioner Plus** acts as a safeguard, assisting with normal gut function and detoxification. **Conditioner Plus** will optimise digestive health and enhance feed conversion. The bio-available collagen assists calcium uptake for healthy skeletal structure and assists repair in joints, bones, muscles, ligaments and tendons. The beneficial effect on internal health means that **Conditioner Plus** will also result in ultimate show condition for the coat.

Horses and ponies under competition stress, changes in pasture, on concentrated feed, stabled, light in-weight, no topline, will all benefit having **Tuffrock Conditioner Plus** daily.
