

STORM'S STORY

by Mel Cruden, Australia.

My Appaloosa gelding tangled with a fence on 10th Feb 2009. He was initially treated with bandaging and antibiotics, then TuffRock Poultrice was used on this wire injury to the hock which improved rapidly and is now a very minimal scar. There was no proud flesh, Storm was very happy to have the poultrice applied and just stood there eating his dinner while we hosed and re-applied each afternoon - we were very happy with the result.
