

TuffRock

Supporting Nature's Balance™

TESTIMONIALS

Kate Wood - Eventing - "All my horses' coats have improved with **TuffRock Conditioner Plus**, and they all look and feel great too! The horses are also keeping condition so much better. I would thoroughly recommend this product to anyone who wants the best out of their horses, performance and appearance-wise. I had a young horse with a bad wire cut to his hind leg which was really swollen. I simply smothered the leg in **TuffRock Non-Medicated Poultice**, and within 2 days it was normal size again. The leg has healed with no scarring which was amazing considering the state it was in. I highly recommend having the poultice on hand for numerous uses, from sore tight backs, to cuts and abrasions, or for poulticing legs after fast work."

Caroline Barber - CTR & Endurance - "I would certainly recommend **Conditioner Plus** to any one wanting to prepare their horses for the show ring as it takes a lot of the prep time away. Also for trouble horses that are not gaining weight, and lastly I think it's ideal as every single benefit of the **Conditioner Plus** relates to the endurance horse. If you put your horse on **TuffRock**, you will be able to cut down on quite a lot of things as it is a broad spectrum horse supplement." I have also been using **Non-Medicated Poultice** on Sooty at events and on other horses at home that may graze themselves in the paddock. Immediately when this product is applied, there is an instant look of pain relief in the horses face. Because the poultice is actually energized, it is working as soon as it hits the surface of the skin. It also draws out toxins, and this is noticeable when the poultice does not dry in certain areas when applied."

Rowan Dixon - Eventing - "One of my horses was quite rundown as well as having a fetlock injury at the start of Winter, so it was an ideal opportunity to start him on **Conditioner Plus** – and he is fantastic now. He's completely sound ... would definitely love to keep him on this amazing product – he was a fussy eater as well, but has been great with his feed and has put on weight. One of the odd things I noticed ... after 7 weeks rest in the paddock, instead of being all slack-muscled and soft, he felt pretty good right from the first ride - didn't seem to have lost much muscle tone at all, and I have to wonder if that's down to the **Conditioner Plus** as well".

Maree Milliken - Kazmere Stud - "As a 'Showie' I've spent a small fortune over the years and tried almost every coat/body conditioning product and mineral mix on the market. I have never noticed any significant (if any) changes in my horse's appearance – Nothing like the before & after shots you see in most flashy advertising. That was until I tried **TuffRock**. I started with 2 horses, my stallion and my very tall/still growing then 5 yr old. Wow, what a difference! Arnie (stallion) became so much lighter, elastic, elevated in his movement & looked amazing - more like a 5 yr old than 15. Gus just bloomed, from a wishy, washy ginga to a rich chestnut, he finally started to fill out his tall frame, with weight over his topline. I loved **TuffRock** so much, at HOY (09) I raved to Peter & Suzanne about it, and now I'm selling it! I can't recommend it enough. My horse's looks, condition, performance and success's start with **Conditioner Plus**."

Sam Peters - Showjumping - I have been using **Conditioner Plus** for a long time now, and I find it brilliant to use on the new horses that come into the stable that are not up to competition standard. I find that it cleans out their systems due to the detoxing effect, puts incredible shine on their coats, and also packs the weight on - speeding up the whole process really. I use the **TuffRock Non-Medicated Poultice** after jumping events and during the shows as it draws the heat out of the legs and keeps them fresh for the next day. I poultice from, and including, the knees and the hocks down. The horses travel very long distances and keep their weight on, or even weigh more on arrival! **TuffRock** products improve all the aspects of an athlete horse.

Lee Cox - Euralea Arabians - "I'm very pleased with the results I've had from using **TuffRock Foal Plus**. My mare, who was already on **TuffRock Conditioner Plus**, actually foaled 21 days early, a lovely colt who was very well covered. He didn't even look newborn, let alone premature! I started him on the **Foal Plus** the day that he was born, and the following six days that was recommended. I am pleased to report that I did not experience any problems with the mare's foal heat. The foal did not scour at all. I will definitely be using this product again when my other foals are born." Pictured is Euralea Escapade at five days old.
