

**TUFFROCK MANUFACTURER'S THE WORLD'S FIRST ENERGISED THREE & TWO DIMENSIONAL VOLCANIC MINERALS WITH BIO-AVAILABLE COLLAGEN**

**100% Australian Natural Products, NIL SWAB for performance or racehorses**

# TuffRock G.I.

***New Gastro-Intestinal liquid***

**TuffRock G.I. is** a new approach for horses designed to focus on the cause ...not the symptoms ... the concept is we may be able to help maintain normal gastro-intestinal conditions as if your horse is free on the range

**TuffRock G.I. is** manufactured from our unique range of 100% Australian natural colloidal volcanic minerals with gut acid normaliser and gut toxin binder  
Lovely earthy taste means easy to paste by syringe over the tongue or add to feed

**3 key focus points that may help horses maintain normal G.I. physiology**

### **A. Gut Acid Imbalance (Ulcer type symptoms)**

Light = 50ml x 2 pre feed am + pm for 10 days  
Heavy = 50ml x 2 pre feed am + pm for 20 days

Why? Nominal pH 7.9 = alkaline + bio-available collagen nutrients for stomach linings  
May need daily maintenance of 25 ml GI or 20 ml Conditioner Plus (Nominal pH 7.7)

### **B. Gut Stress (Colic or founder type symptoms)**

50ml x 2 in 12 hours, may need additional 30 ml pre-feed for 30 days  
Why? – help maintain normal acetic acid + inbuilt toxin binder

Generally regarded imbalances lead to hind gut fermentation (pre-cursor to colic)

### **C. Gut Calm**

50 ml as required, max 200 ml over 24 hours  
Why? A + B = C

**TuffRock G.I.....** Recommended for dirt eating horses

**TuffRock G.I....** can help horses gut ready for the new

**TuffRock Equine Joint Formulae**
